Tokenizing Social Transformation

INTRODUCTION / VISION

In a world dominated by economic injustice, the richest 1% of the global population now holds a staggering 46% of the world's wealth, while the bottom 55% collectively possess just 1.3%! This glaring wealth gap is further exemplified by the fact that the 26 richest individuals now hold as much wealth as the poorest 3.8 billion people combined. It's hard to fathom such numbers, but sadly, they're real.

Let's zoom in a little. In the United States, the top 10% own nearly 67% of the nation's wealth, while the bottom 50% control just 2.4% of the total assets. Meanwhile, CEO compensation has increased by 940% since 1978, while the typical worker's compensation has only seen a 12% increase over the same period. These contrasts reflect a deep, systemic problem, where wealth is not only concentrated but actively hoarded by those in power, leaving entire communities of hard-working people disenfranchised. Only in the area of finance has such a small percentage of the population been able to marginalize a majority of the people!

These inequities are not merely economic. Money bleeds into every aspect of our lives—housing, public safety, health and mental wellness, education, food security, the list goes on. These are social and systemic barriers that prevent people from accessing the resources they need to break free.

Here's the sad but simple truth... Our social and economic systems were built from the ground up to benefit those who need that benefit the least, while the rest of us hope, pray, and work our butts off just to stay above water.

But cryptocurrency offers an opportunity for radical change. One day, an obscure person codenamed Satoshi Nakamoto developed a new system—a decentralized way around the hurdles and pitfalls that exist to keep the masses economically depressed. But the story only begins with his innovative leap forward—Bitcoin. It opened the floodgates of opportunity; but in people's mad dash to change their fortunes, there was an inevitable rush of those cheating and scamming their way to riches. From rug pulls to honeypots, from tax farms to hidden mints—today, there are an estimated 50,000 new tokens created every single day, and most of them are either quick pump-and-dumps or flat-out scams.

Some people have written off crypto as nothing but a gamble at best, or a Ponzi scheme at worst; but there are still more investors coming into the space than leaving it, demonstrating how hungry people are for change.

They know that the landscape is riddled with mines, but they're so desperate to be free, they traverse the field anyway. Friends, this is not the best we can do!

Power to the People (PTTP) is not just another token among so many others, but a movement envisioned as a way to lift people off of that field and carry them to the freedom they dream of. It's a way to empower everyday people to no longer be subject to the whims of their bosses, bankers, and creditors, a way to use the power of blockchain technology to finally give financial autonomy to those who have been left behind.

This is a digital rebellion—a spark created to light a fire of economic emancipation that doesn't depend on the very systems that are designed to work against us. We no longer have to fight within that system. We can now go around it!

Why PTTP?

PTTP is our answer:

- A tool for empowerment.
- A movement for liberation.
- An exit plan for the system that exploits us.

We don't pretend this token will change the world overnight; but it can help you change your world by connecting you to a community that sees your worth, rewards your contributions, and builds with you, not against you.

PTTP is so much more than a form of currency. It's an uprising disguised as code. It's a clenched fist in the face of apathy, a weapon for the oppressed. It's our tool for disempowering systemic inequality and empowering those who have been left out of the economic conversation. It's our way forward, a roadmap for the generation that's had enough.

But this isn't going to happen all by itself. There is no movement of tools, only of the people with the courage, conviction, and unwavering commitment to put the tools to work. The question is, will you raise your fist and put this tool to work for yourself, your family, and your community, or will you sit on the sidelines and watch?

We have an opportunity to change things. But do we have the will to be free? \$PTTP token says we do. So, let's raise our fists and break free—together!

TOKENOMICS

PTTP was built with one goal in mind: economic and social empowerment for the people. Economic empowerment is but the first step, because in a world where money decides who gets heard, who gets access, and who gets to lead, it's almost impossible to be socially powerful while economically powerless.

For this reason, token holders within this community are called Fists! It demonstrates our collective, long-term commitment to resist the socioeconomic systems that have disempowered us, our friends, and our neighbors.

We've designed our tokenomics around this mission-oriented purpose, so that it's not just considered a way to make quick money, but as a new economy intended to:

- reward participation, not just speculation,
- build resilience, not just hype, and
- pave the road toward a future where your wallet isn't the only thing that grows—your voice does, too.

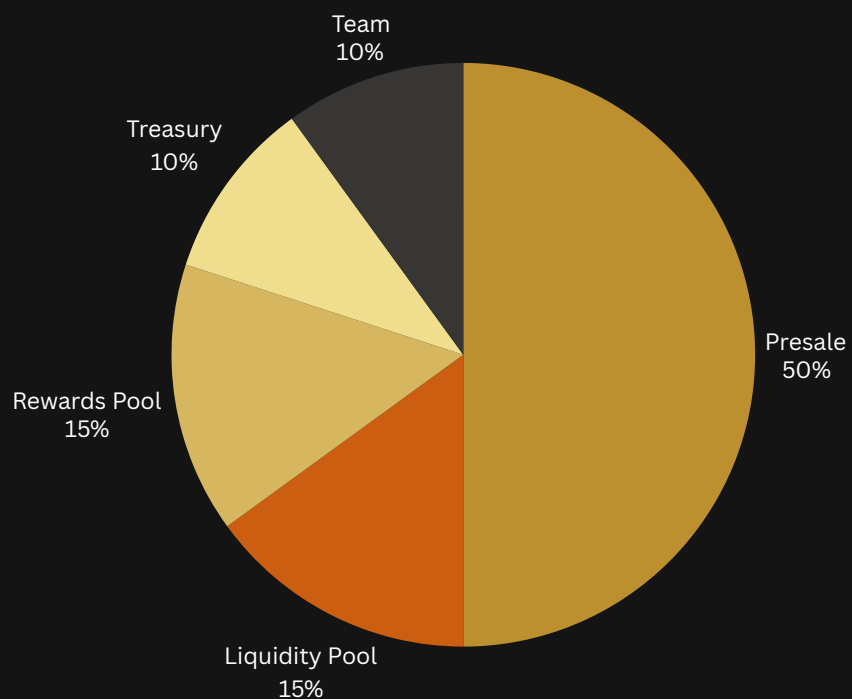

Token Supply

The total supply of \$PTTP is fixed at **5,000,000,000 (5 billion) tokens**. These tokens are allocated strategically to support robust liquidity, long-term growth, and sustainable ecosystem development.

Resource Distribution

Category	Allocation	Tokens
Presale	50%	2,500,000,000
Liquidity Pool	15%	750,000,000
Rewards Pool	15%	750,000,000
Treasury	10%	500,000,000
Team (vested)	10%	500,000,000

Why 5 Billion Tokens?

While many meme-inspired or community tokens launch with exaggerated supplies—usually in the trillions or even a quadrillion—\$PTTP takes a different path. We've chosen a total supply of 5 billion tokens, intentionally striking a balance between abundance and accountability.

🧠 **Scarcity breeds value.** A tighter supply means every token holds more weight. Whether you're earning through staking, quests, games, or the many other ways built into our ecosystem, our rewards actually matter.

🛡️ **Immutable and fixed.** Our token supply is hard-capped. There is no minting function, inflation switch, or hidden lever that can dilute your holdings.

🎮 **Built for utility.** With 5 billion tokens, we have ample supply to power staking yields, gamified experiences, social engagement, and other opportunities to earn rewards.

🔄 **A real economy.** We don't need trillions of tokens to create movement. We need a system where tokens flow, earn, evolve, and reflect the strength of the community that powers it.

Unlike speculative tokens that rely on large numbers to simulate accessibility, \$PTTP relies on real engagement and real utility. You won't see meaningless zeros, but a living, breathing economy with real value behind every wallet.

Liquidity Lock

To promote long-term trust and protect the integrity of the launch, 100% of the LP (Liquidity Pool) tokens created at launch will be locked with UNCX Network (formerly: UniCrypt) for one year. This means that the tokens used to pair \$PTTP with BNB for trading (on PancakeSwap) cannot be withdrawn, moved, or altered during the lock period, ensuring price stability and preventing a rug pull.

Even after the LP unlocks, the original liquidity will only be removed under the following conditions:

1. There will be sufficient liquidity remaining to not cause a significant price fluctuation from the withdrawal.
2. No more than 25% of the original liquidity may be withdrawn within any 30-day period.
3. The withdrawn assets must be delegated to one or more of the tax allocation categories (identified later). This decision will be based on what is best for the advancement of the ecosystem at the time.

We are committed to creating a thriving ecosystem with real, long-term staying power, not just hype.

Team Vesting Schedule

The Team allocation will follow a linear vesting schedule, released in four tranches of 25%—the first after 6 months, with an additional 25% unlocking every 3 months thereafter (a 15-month total vesting period).

This setup ensures that the team remains committed to the long-term success of the project, while also being appropriately compensated for their ongoing work to build and manage this complex ecosystem.

Dynamic Tax Allocation

To ensure long-term sustainability and strategic resource flow, \$PTTP uses a dynamic tax allocation model that adjusts based on transaction type. This adaptive system allows the protocol to align economic behavior with practical ecosystem needs—rewarding growth, defending against volatility, and sustaining development. The tax is not a penalty. It's a redistribution of energy, fueling the community, the infrastructure, and the ecosystem we're building together.

TAX RATE

- **Buy Tax:** 7%
- **Sell Tax:** 7%
- **Transfer Tax:** 0% (wallet-to-wallet transfers are tax-free)

Buy Tax Allocation

When tokens are bought, they enter community hands and are often staked, claimed, or used in other reward-generating ways. The protocol responds by allocating more resources to the rewards ecosystem.

Category	Allocation	Purpose
Rewards Pool	30%	Fuels staking, airdrops, social missions, and other incentives.
Market Stability Pool	20%	Fuels liquidity injections and buybacks to reduce volatility, and builds a reserve for future exchange listings.
Liberation Pool	15%	Funds the Liberation Vault staking contributions.
Treasury	15%	Reserved for development, marketing, and operations.
Activity Reflections Pool	10%	Proportionally distributed to Fists who actively engage with the protocol.
Fist Equalizer Pool	10%	Equally distributed to all qualifying Fists who opt-in.

Sell Tax Allocation

When tokens are sold, the protocol reduces focus on the rewards pool and leans more heavily into price protection and liquidity defense.

Category	Allocation
Market Stability Pool	30%
Rewards Pool	20%
Liberation Pool	15%
Treasury	15%
Activity Reflections Pool	10%
Fist Equalizer Pool	10%

Note: All tax proceeds are auto-routed and tracked transparently via smart contract.

Note: Tax allocations are subject to occasional review and adjustment to ensure maximum impact and sustainability.

Why Dynamic Allocation Matters

Traditional static tax systems can lead to:

- underfunded rewards during high buy volume, and
- weak liquidity and buyback power during market downturns.

PTTP's adaptive model is designed to scale with community behavior, ensuring:

- more consistent staking and rewards funding,
- greater resilience during selloffs, and
- a healthy, fair system for both Fists and contributors.

Buys fuel the revolution. Sells defend it. PTTP adapts.

Final Thought

These tokenomics aren't simply a duplication of other tokens. They were carefully developed to ensure not only the long-term success of the token and ecosystem, but also the token's mission of economic resistance, social engagement, and vision-backed utility

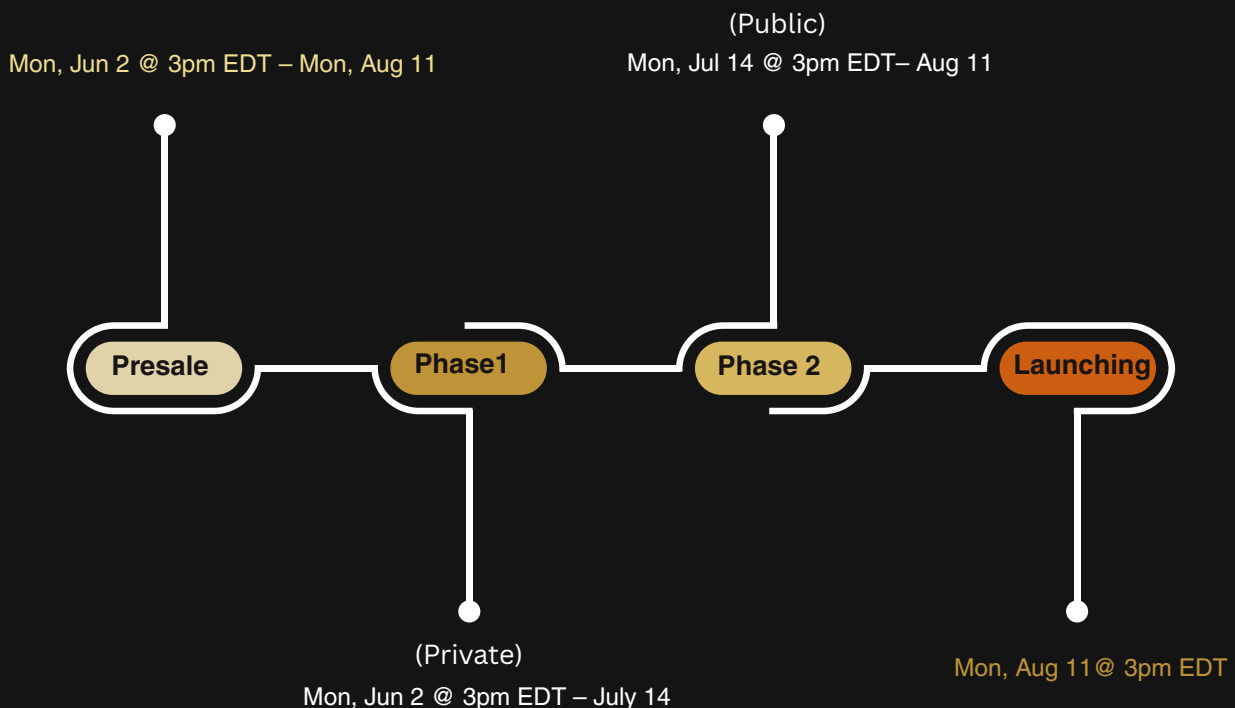

TOKEN PRESALE & LAUNCH

The launch of \$PTTP is designed to be accessible and momentum-driven. The phased presale structure allows early believers to enter at increasingly valued tiers, while positioning the token for a confident debut on the open market.

Presale Timeline

The presale will begin with a private sale hosted directly at pttp.finance, followed by continued phases if demand remains high. If momentum slows, a transition to a public launchpad may occur.

Presale Structure & Rounds

A total of 2,500,000,000 \$PTTP (50% of the total supply) will be allocated for presale, distributed across five price rounds.

	Tokens For Sale	Price Per Token	Discount / OFF
Round 1	300,000,000	\$0.000675	25%
Round 2	400,000,000	\$0.00072	20%
Round 3	500,000,000	\$0.000765	15%
Round 4	600,000,000	\$0.00081	10%
Round 5	700,000,000	\$0.000855	5%

Buy Limits

- **Minimum Buy:** \$50
- **Maximum Buy:** \$1,000 per wallet

Claiming Tokens

To protect the token price from immediate dumping at launch, tokens bought during presale will be subject to a nominal vesting period as follows: 50% available at TGE (Token Generating Event, aka token launch), with an additional 10% unlocking every week for 5 weeks.

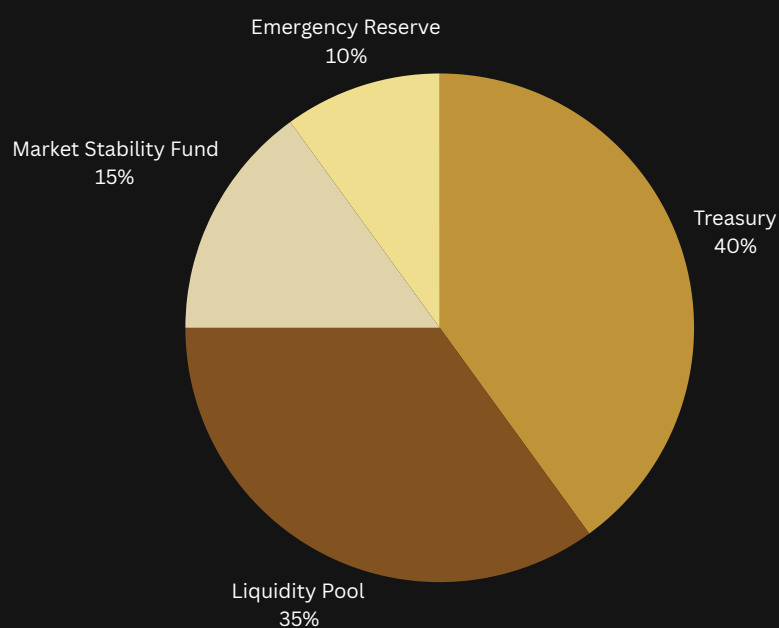

When unlocked, tokens will be claimable via a secure claim portal at pttp.finance. Presale buyers should return to the website after each unlock in order to claim their tokens.

Although utilizing a vesting mechanism may be discouraging to some, it is important to keep in mind that not only is this vesting period comparatively short compared to other protocols, but this is only being implemented to protect the integrity of the protocol and the value of our Fists' investments. This is not a meme token intended for a quick pump-and-dump. It is a utility token intended for social and economic empowerment. This vesting policy only serves to further that purpose.

Presale Fund Allocation

The funds raised during presale will be allocated strategically to ensure deep liquidity, strong operations, and long-term ecosystem growth. The final allocation breakdown is as follows:

Category	Allocation
Treasury	40%
Liquidity Pool	35%
Market Stability Fund	15%
Emergency Reserve	10%

The Market Stability Fund

This fund serves as a strategic reserve designed to enhance \$PTTP's market health and trading experience. It provides the flexibility to respond dynamically to evolving market conditions, allowing for liquidity injections during times of increased trading volume or strategic buybacks during market corrections and periods of selling pressure. Unlike rigid allocation models, this fund empowers our team to make data-driven decisions that best serve Fists at any given moment. By maintaining this adaptable reserve, we create additional layers of protection beyond our initial liquidity injection, reinforcing \$PTTP's foundation for sustainable long-term growth.

NOTE: You'll notice a difference in our usage of the words "pool" and "fund" in our allocation tables. "Pool" refers to reserves kept in \$PTTP, while "fund" refers to reserves kept in BNB (or other coins).

The Emergency Reserve

This fund represents our commitment to long-term ecosystem sustainability and resilience. It provides a safeguard against unanticipated challenges that may arise in the volatile cryptocurrency landscape, including unexpected development needs, market disruptions, or other factors that could otherwise threaten the project's strength or continuity. Unlike many projects that allocate all initial capital to immediate needs, this reserve demonstrates prudent financial stewardship by preparing for contingencies while signaling to our community that we've built robust protection mechanisms into the very foundation of PTTP.

While our target raise for presale is approximately \$1,000,000, actual results may vary. Should we raise less than this target, the allocation of presale funds may be strategically adjusted to ensure the long-term success and sustainability of the protocol based on available resources.

Token Launch & Listing

\$PTTP will launch on the **Binance Smart Chain (BSC)** and will be listed on the Pancake Swap DEX (Decentralized Exchange) with a liquidity pool funded from proceeds from the presale.

The launch price will be set at \$0.0009, providing stability while avoiding extreme early arbitrage opportunities. This approach balances fair value at listing with healthy post-launch price action.

Trading Limitations (Anti-Whale Settings)

To protect early Fists and promote a fair and community-driven presale and launch, PTTP includes temporary anti-whale limitations that restrict the concentration of tokens and the potential for high-volume manipulation during the early stages of trading.

Initial Limitations:

- **Max Wallet Size:** 2.5% of total supply (125,000,000 \$PTTP)
This prevents any single wallet from accumulating a disproportionate amount of tokens in the early days, encouraging broader distribution.
- **Max Transaction Size:** 1% of total supply (50,000,000 \$PTTP)
This limits the size of any single buy or sell transaction, protecting the chart from sudden, large-volume swings and making it harder for bots to dominate.
- **Limited Scope:** These restrictions apply only to buys and sells. Wallet-to-wallet transfers are unrestricted.
- **Limit Removal:** These restrictions are temporary and will be reevaluated as liquidity and holder distribution grow, in order to promote open-market growth and greater trading flexibility.

UTILITY & ECOSYSTEM

\$PTTP isn't just a token, and our ecosystem isn't just a cover for a meme coin. This is an engine for social and economic empowerment. Here's how we provide our Fists with a force for real-world change.

1. Staking

Staking is the heartbeat of the PTTP ecosystem—rewarding those who believe in the long-term vision with opportunities to grow their holdings and influence.

Regular Staking

Regular stakers accumulate rewards passively over time and can claim them at any time. Upon claiming, Fists may choose to:

- receive rewards directly to their wallet, or
- compound rewards into their staking balance

Rewards accrue daily, balancing consistency for Fists with sustainability for the ecosystem. Unlike vault staking (explained below), regular staking features an adjustable APY (Annual Percentage Yield) that may fluctuate over time based on overall participation, reward pool levels, and ecosystem health.

This approach empowers Fists to better manage their growth strategy—whether short-term or long-term—while remaining responsive to unpredictable market and ecosystem dynamics.

Please Note: While there is no lockup required for staked \$PTTP, there is a **7-day cooldown period** for unstaking, meaning that staked \$PTTP won't be available for transfer back to a Fist's wallet until 7 days after it has been unstaked.

Vault Staking

Vault staking offers fixed-term staking pools with higher rewards for longer commitments. Options include 60, 90, 180, and 365-day lock periods. Each vault comes with a **fixed APY** that is locked in at the time of deposit.

Rewards are calculated using **simple (non-compounding) APY**, ensuring predictable growth and transparency while preserving protocol sustainability.

Early Unstaking Penalty

Vault stakers may unstake their \$PTTP early; however, the following policies are in place to preserve the integrity of our staking system:

- A 7-day cooldown period will apply to early vault unstakes (the same as our regular staking protocol).
- Fists may partially unstake (not unstaking their entire vault balance), in which case penalties will only apply to the unstaked portion.
- A graduated penalty of unstaked principal and/or rewards will apply in accordance with the following fee schedule:

% of Lock-Period Completed	Principal Penalty	Reward Penalty
0-25%	10%	100%
26-50%	5%	85%
51-75%	0%	75%
76-99.9%	0%	65%

This policy affords Fists both freedom and incentive, while still encouraging clenched fists (commitment to the ecosystem) and long-term engagement.

2. Liberation Vaults

\$PTTP isn't just about individual gains, but also about building collective power. Our Liberation Vaults are a unique part of the ecosystem designed to direct a portion of the project's momentum into real-world change. These mission-driven staking pools allow Fists to transform passive income into active impact—channeling staking yield into funding for causes aligned with the values of freedom, equity, and empowerment that define this movement.

How It Works

Liberation Vaults operate under a User-Yield Sacrifice Model. When staking in a Liberation Vault, Fists choose to forfeit a percentage of their staking rewards—50%, 75%, or 100%. These forfeited rewards are redirected to dedicated impact pools tied to specific mission-aligned causes.

Each month, the protocol allocates funds from the Liberation Pool (funded by transaction taxes) to these impact pools in proportion to the sacrificed yields contributed through each Liberation Vault.

The greater a Fist's sacrifice, the larger the share of the Liberation Pool their chosen cause receives! In effect, the impact pools get funded by Fists' sacrificed yields, in addition to a proportional share of our Liberation Pool.

Liberation Vault participants are allowed to nominate one non-profit per month to receive their vault's reward (its impact pool). These nominations (including past nominations, as the list continues to grow each month) are voted on each month by all Liberation Vault participants—that is to say, while Fists may only nominate an organization serving their vault's cause, they can cast one vote for each Liberation Vault, regardless of the Vault(s) they participate in. We then, on a monthly basis, donate the impact pools to the organizations that receive the most votes for each cause/initiative.

NOTE: Staked principal remains fully under the Fist's control and is withdrawable after the lock period (or earlier with applicable penalties—see vault staking penalties).

Choose Your Cause

Participants choose which cause/initiative their sacrificed yields will support, including:

Children and Youth Empowerment

Civic Engagement & Rights

Criminal Justice & Policing

Economic Justice & Development

Education & Literacy

Environment & Climate

Food Security

Housing & Homelessness

LGBTQ+ Advocacy & Justice

Mutual Aid / Emergency Relief

Racial & Ethnic Justice

Alternatively, Fists can choose to support whatever cause/initiative is currently featured by the protocol, allowing their yield to align with focused, time-sensitive campaigns driven by community momentum or pressing needs.

This choice-driven model ensures that participants feel connected to the causes they care about most. Liberation Vaults turn ordinary staking into a tool of generosity and justice, where building personal wealth also builds community uplift and resilience.

3. Skill-I-Rise

While staking and participation rewards provide passive income streams, true economic liberation requires avenues for active value creation. The Skill-I-Rise platform serves as the peer-to-peer value exchange of our ecosystem—where community members can directly exchange knowledge and services with one another using \$PTTP as the medium of exchange.

How It Works

- **Skills Marketplace:** Community members list their services, from content creation, design and coding to financial mentorship, resume or grant-writing and educational tutoring.
- **Merit-Based Opportunities:** Unlike traditional platforms that favor those with existing credentials, Skill-I-Rise uses on-chain reputation and community feedback to help establish credibility.
- **Escrow Protection:** Smart contract escrow systems protect both service providers and clients, releasing payment when milestones are completed.
- **Skills Development Pathway:** Beginners can access training and microtasks to build credentials before taking on larger projects.

Empowerment Benefits

This platform creates tangible economic opportunities by:

- Converting skills directly into \$PTTP tokens
- Building transferable on-chain work history
- Creating client relationships that can extend beyond the platform
- Providing alternative or even potentially primary income streams

Skill-I-Rise embodies our core philosophy that economic liberation comes through creating systems where people can directly exchange value without exploitative intermediaries. By recognizing and rewarding the diverse skills of our community members, we create opportunities for immediate economic advancement while building a resilient ecosystem that delivers value regardless of market conditions.

4. Learn-to-Earn

The Learn-to-Earn program is designed to address one of the root causes of economic inequality: access to quality financial education. By incentivizing learning with token rewards, we transform education from a luxury to an economically rewarding activity, creating a cycle where gaining the knowledge necessary to advance in life leads directly to financial empowerment.

How It Works

Educational Modules

The program consists of educational content covering:

- **Financial Fundamentals:** Budgeting, saving, debt management
- **Crypto Literacy:** Blockchain basics, wallet security, DeFi concepts
- **Economic Justice:** Understanding systems of inequality and paths to change
- **Investment Strategies:** From traditional markets to crypto opportunities
- **Community Economics:** Mutual aid, cooperative models, and collective power.

Each module includes video lessons, interactive exercises, and knowledge checks designed to ensure genuine comprehension rather than passive consumption.

Reward Structure

Participants earn \$PTTP tokens based on:

- **Module Completion:** Base rewards for finishing educational units
- **Knowledge Verification:** Quizzes and practical applications that test understanding
- **Content Creation:** Highest rewards for contributing new educational materials.

This multi-tiered approach ensures that rewards align with genuine learning outcomes while creating opportunities for community members to transition from learners to educators

Technical Implementation

The Learn-to-Earn program is built on a verification framework that:

- Uses zero-knowledge proofs to verify quiz completion without revealing specific answers
- Implements plagiarism detection for content creation
- Employs peer review mechanisms for quality control
- Issues soulbound achievement tokens as proof of knowledge mastery

These mechanisms ensure the integrity of the system while preserving participant privacy.

Integration with Skill-I-Rise

The Learn-to-Earn program serves as a direct on-ramp to the Skill-I-Rise platform:

- Skills learned can be immediately monetized in the marketplace
- Educational achievements enhance user credibility scores
- Teaching becomes a marketable skill in itself

This integration creates a complete pathway from learning to earning, embodying our commitment to sustainable economic empowerment.

By turning education into an economic opportunity, the Learn-to-Earn program addresses both immediate financial needs and long-term empowerment. It recognizes that true liberation requires not just resources but the knowledge to use them effectively, creating a foundation for sustained economic agency within our community.

5. Games, Quizzes & Challenges

Fun meets funding. The PTTP ecosystem will feature:

- **Games & trivia** (crypto, finance, social justice themes)
- **XP leaderboards** for consistent participation
- **NFT prizes** and airdrop multipliers
- **Liberation lottery** divided 50% to the winner, 50% to the Liberation Pool

Prizes are rewarded regularly for participating in and/or winning these opportunities. It's about encouraging ongoing engagement, and celebrating the community for learning and helping others level up.

🧩 6. NFTs & Social XP

In a world that often strips people of voice and agency, \$PTTP offers a new way to be seen, valued, and connected. Through NFTs (Non-fungible Tokens) and a social XP (Experience Points) system, this isn't just about owning a token—it's about owning your place in a movement.

NFTs can be airdropped to you for participating in things like presale, staking, voting, social media campaigns, etc., and can also be minted by you for a number of purposes, e.g. becoming an official “Champion” of the protocol, showing your support of or solidarity with various causes, creating “In Honor of” or “In Memory of” tributes for display in the ecosystem, among other reasons.

Social XP = visibility, access, and influence within the community. The system ensures that social capital is rewarded alongside financial participation, building a community that's inclusive, dynamic, and action-driven.

This layer of the ecosystem transforms everyday actions—staking, sharing, showing up—into proof of purpose, expressions of power, and badges of participation.

🔪 7. Community Missions

The project also introduces a Social XP system to track and reward your activity across the PTTP ecosystem.

It's a gamified social layer, where Fists earn XP and reputation by:

- Sharing content and memes
- Inviting new community members
- Participating in quizzes, campaigns, or on-chain governance

As you level up, you'll unlock:

- Badge upgrades
- Priority for airdrops and NFT rewards
- Bonus staking APY points
- Future voting weight bonuses (when governance is introduced)

Ecosystem Websites

As a multifaceted ecosystem, PTPP aims to provide a seamless experience for both investors and community members. To ensure that our mission of economic empowerment and social justice is supported across all touchpoints, we have created two distinct, yet interconnected platforms:

1. **pttp.finance: The Investor Hub**

pttp.finance serves as the primary platform for all things related to investment and tokenomics. It is designed with a focus on Fists, investors, and individuals interested in the financial growth of the project.

- **Token Sale & Presale Access:** pttp.finance will host the presale and the official token launch, providing easy access for investors to buy into the project. The site will include clear token allocations and roadmaps for ongoing development.
- **Transparent Tokenomics:** Investors can view real-time data on the circulating supply, transaction taxes, and reward mechanisms. This transparency builds trust in the ecosystem and assures Fists that their investment is aligned with the project's goals of wealth empowerment and social impact.
- **Staking and Governance:** The site will also feature an intuitive interface for Fists to stake tokens, participate in governance voting, and manage their investments. This empowers Fists to play an active role in shaping the future of the ecosystem, ensuring that the project evolves in line with community values.
- **Educational Resources:** In addition to investment tools, pttp.finance will include educational resources focused on financial literacy, cryptocurrency, and social justice. These materials will help users understand how blockchain technology can be a powerful tool for addressing inequality and economic oppression, while also educating them on the project's tokenomics and decentralized finance mechanisms.

2. pttp.social: The Community & Engagement Platform

pttp.social is the heart of the community engagement aspect of the ecosystem. This platform is dedicated to building a thriving, active community around our social justice mission. It's here where members can participate in meaningful discussions, engage in social impact activities, and contribute to the ecosystem's growth.

- **Social Justice Focus:** The site will feature sections dedicated to social justice issues, such as racial equality, economic justice, and environmental causes. Users can read articles, watch videos, and engage in community-led campaigns to learn more about how PTTP is directly impacting these areas.
- **Missions & Gamification:** In line with our mission to gamify social change, pttp.social will offer missions and challenges where Fists can participate in tasks that support the ecosystem. These tasks can range from sharing educational content, to donating tokens to causes, or even spreading the message of justice on social media. As Fists complete tasks, they will earn XP points, NFTs, and other rewards, encouraging them to stay engaged and active.
- **Leaderboards & Recognition:** By creating a leaderboard system, pttp.social can reward Fists for their efforts in advocating for social change and contributing to the ecosystem's growth. Top Fists may receive exclusive rewards such as special NFTs, higher staking yields, or token airdrops.
- **NFT Marketplace & Donation Platform:** pttp.social will host an NFT marketplace where Fists can buy, sell, and trade NFTs tied to the project's social justice themes. Additionally, there will be a donation platform integrated into the site, allowing Fists to donate tokens to community-driven causes. This allows Fists to see firsthand how their contributions are supporting real-world change.
- **Community Voting:** Members can participate in community votes, deciding on key project directions, such as which causes to fund through the donation platform mentioned above. This ensures that the community has a voice in determining the projects and charities that benefit from the ecosystem's token economy.

Integration Between Platforms

While pttp.finance and pttp.social serve different purposes, they are deeply integrated to provide a unified experience for users. Here's how they connect:

- **Cross-Platform Engagement:** Users can move seamlessly between the two platforms. For example, an investor who purchases tokens through pttp.finance may then engage in community-driven initiatives on pttp.social, participating in social justice campaigns or NFT challenges that align with their values.
- **Incentivized Participation:** Tokens earned from social engagement (e.g., through missions, contests, or donations) can be used on pttp.finance for staking or other financial activities. This ensures a continuous loop of engagement that supports both the financial ecosystem and social impact initiatives.
- **Gamified Experience:** As users engage with both platforms, they can earn rewards that are usable across both spaces. For example, community points or special NFTs earned in pttp.social may be used for enhanced staking rewards or governance rights in pttp.finance. This ensures that the experience remains rewarding and consistent across all user interactions.

Long-Term Vision

As the ecosystem grows, both pttp.finance and pttp.social will evolve into fully-featured platforms designed to empower individuals in both the financial and social justice arenas. Our long-term goal is to create a self-sustaining ecosystem where financial growth and social change work hand-in-hand. We envision:

- Increased participation in both financial and social justice actions, leading to more economic equity and global impact.
- A robust, decentralized ecosystem that continues to give more power to Fists, community members, and social justice advocates.

BUYBACK MECHANISM

To help stabilize price action and strengthen investor confidence, PTTP includes a manual buyback mechanism intended to offer protection for the token during periods of sell pressure.

? How It Works

15% of the presale raise is reserved to initially fund a Market Stability Fund, which supports liquidity injection and token buybacks in times of increased trading volumes and market corrections.

20%/30% (buys/sells) of the transaction tax is directed to the Market Stability Pool.

The Market Stability Pool accumulates in \$PTTP and is converted to BNB and added to the Market Stability Fund when two conditions are met:

- The Pool holds a minimum threshold of \$PTTP (to ensure micro-conversions do not waste gas fees), and
- The market cap is above a predefined level in relation to the size of the Pool (ensuring conversions happen during strategic windows that won't significantly impact the \$PTTP price).

If and when \$PTTP experiences significant sell pressure, funds from the Market Stability Fund may be used to purchase \$PTTP tokens from the open market, injecting buy pressure and helping support the token price.

What Happens to the Bought-Back Tokens?

Rather than burning tokens bought through this mechanism, as some crypto tokens do, PTTP uses them to fund our rewards pool, thereby keeping them out of circulation until actions are taken by community members that help to build the ecosystem. On rare occasions, bought-back tokens may also be used to fund the Treasury if resources for the ongoing development of the ecosystem are strained.

By accumulating BNB and deploying it when most needed, the Market Stability Fund acts as a stabilization engine—protecting the health of the ecosystem and the interests of the community.

Rather than burning tokens bought through this mechanism, as some crypto tokens do, PTTP uses them to fund our rewards pool, thereby keeping them out of circulation until actions are taken by community members that help to build the ecosystem. On rare occasions, bought-back tokens may also be used to fund the Treasury if resources for the ongoing development of the ecosystem are strained.

By accumulating BNB and deploying it when most needed, the Market Stability Fund acts as a stabilization engine—protecting the health of the ecosystem and the interests of the community.

ACTIVITY REFLECTIONS

To encourage ongoing participation and active engagement within the PTTP ecosystem, the platform has a weekly activity reflections system. Funded by an allocation of protocol tax revenue, this system will reward Fists based on their spending activity within the ecosystem, such as staking, purchasing NFTs, participating in games, and other activities that require spending \$PTTP. The more a Fist engages, the greater their share of the weekly reflections pool.

? How It Works

The activity tracking period will run from Saturday to Friday each week. During this period, the system will log and track the amount of \$PTTP spent by each Fist on approved activities within the ecosystem.

Claim System

At the end of each period, a weekend claim window will be opened on Saturday and Sunday for qualified Fists to claim their proportional share of reflections.

Redistribution of Unclaimed Rewards

To ensure the sustainability of the ecosystem and further incentivize active engagement, any unclaimed rewards after the claim window closes on Sunday night will be redistributed to the Rewards Pool.

Benefits of the Claim System

- **Gas Efficiency:** Reduces the need for costly on-chain transactions by consolidating reflections into a single weekly claim window, minimizing gas fees and ensuring a more efficient use of blockchain and ecosystem resources.
- **Transparency and Fairness:** The redistribution of unclaimed rewards to the Rewards Pool ensures that funds are used effectively for the ecosystem's long-term development.

By implementing this unique activity reflections system, PTTP ensures that Fists are rewarded for their engagement while keeping the ecosystem sustainable and aligned with the platform's mission to empower individuals and communities.

THE FIST EQUALIZER BONUS

The Fist Equalizer Bonus was designed to offer equitable rewards to active Fists. It ensures that the benefits of participation within the ecosystem are fairly distributed, rewarding those who engage, stake, and contribute to the growth of the project, rather than token wealth or wallet size.

? How It Works

The Bonus is funded through a portion of the transaction tax collected during token buys and sells. Once per month, the accumulated bonus fund is distributed equally among eligible participants. The rewards are based on a random set of criteria that changes each month, ensuring that rewards are based not just on token holdings but on active participation in the ecosystem.

Eligibility

- Participants must opt-in each month by paying a small opt-in fee. The opt-in window is open from the first Monday of the month to that Friday, and covers the previous month's activity.
- Before opting in, potential participants will be able to see the value of the Bonus Pool, as well as how many eligible opt-ins have been received so far during that window, empowering them to make an informed decision on whether or not to opt-in.
- Once a Fist opts-in, they immediately learn whether or not they qualify for the bonus, on the basis of the randomized criteria selected at the beginning of the month/cycle.

Distribution

- The Bonus fund is equally distributed among all eligible participants after the opt-in window closes.

- Eligible participants can claim their rewards during the claim window, which opens up immediately after the opt-in window has closed. This same claim system pays out Activity Reflections, allowing eligible Fists to claim both sets of rewards with a single claim.

Why This is a Great Addition to the Protocol

The Fist Equalizer Bonus brings several key benefits to the PTTP ecosystem, strengthening the core principles of community engagement and fairness.

1. Equitable Reward Distribution

The bonus is distributed equally among eligible participants, ensuring that it's not concentrated in the hands of wealthy whales or those with multiple wallets. This approach ensures that smaller Fists and active participants get a fair chance to earn rewards based on their involvement in the ecosystem, not just the size of their holdings. We wouldn't be much of a community-oriented project if we adopted the same "reward the rich" posture that exists in our fiat economy.

2. Disincentivizing Wallet Manipulation

One of the key challenges when designing this bonus was finding a way to prevent Fists from gaming the system by splitting their holdings across multiple wallets in order to qualify for a larger share of the equalized reward. The opt-in fee and randomized eligibility criteria address this challenge by:

- ensuring that only committed Fists who are willing to invest in the system will participate. Because people are not guaranteed to be eligible simply by opting in, those who are not willing to allow their opt-in fee to contribute to the overall ecosystem will likely not participate in the Bonus, thereby increasing the share for those who do.
- disincentivizing Fists from splitting their holdings across multiple wallets in an attempt to gain multiple shares of the bonus. By not knowing the eligibility criteria ahead of time, the hope is that the opt-in fee will make it a less-appealing prospect for people to opt-in from multiple wallets. We regret that these types of measures have to be put in place, but alas, we are fighting a mentality developed under the unethical, greed-based system that this protocol exists to disempower.

3. Encouraging Ecosystem Engagement

Rather than rewarding passive Fists, this bonus incentivizes Fists to be active participants in the ecosystem. This could include activities like:

- **Staking** – in the regular, vault, and/or Liberation Vault staking platforms
- **Engagement** – social media posts, referral activity, on-chain gaming, and/or other activity
- **Holding** – minimum token holding and/or no sells within a particular time frame

In this sense, the Bonus is similar to the Activity Reflections reward, but instead of being proportional, and open to all Fists, it is distributed equally only to eligible Fists, making each individual's share more substantial.

4. Transparency and Accountability

After the opt-in window closes, participants will be able to view what the criteria were for that particular month/cycle, and why they did or did not qualify. This feedback provides clarity for Fists and encourages ongoing, broad ecosystem participation in the future.

What happens to the opt-in fee?

The opt-in fee is routed to the Rewards Pool. It all stays within the ecosystem, helping to bolster our efforts to empower the community with diverse opportunities for financial and social enrichment.

Conclusion

The Fist Equalizer Bonus is an exciting addition to the ecosystem that addresses the challenges of rewarding active participation and equitable distribution of rewards. By tying eligibility to community actions, holding commitments, and ecosystem engagement, this bonus helps create a more dynamic and thriving ecosystem, where rewards are fairly distributed without favoring whales or short-term speculators. The use of randomized criteria and an opt-in fee ensures that the system remains fair and incentivizes long-term, active commitment from those profiting from it.

GOVERNANCE & DAO VISION

Decentralization isn't just a buzzword—it's a blueprint for power that belongs to the people. While PTTP will not launch with a DAO (Decentralized Autonomous Organization) structure on day one, community governance remains central to the long-term vision.

This project was created to empower people, not just through tokens and memes, but through shared decision-making, transparency, and real influence.

Why No DAO (Yet)?

Launching a DAO too early can be dangerous. It can lead to:

- voter apathy due to lack of education or engagement,
- power grabs by early whales,
- confusing or conflicting proposals, and
- poor decisions made before a clear vision is established.

We must also remember that the majority does not always make decisions that are in their best interests, or in the interests of the voiceless masses. One need only look at the political systems around the world to know how true this is. Democracy can be hacked, especially by the rich and powerful. We do not want PTTP to fall prey to the same vulnerabilities as civic governance. This is why this protocol will begin under centralized leadership, with a core team responsible for building, educating, and casting a vision for what this community is intended to be.

When the time is right—when the community is large, informed enough, and passionate enough—we'll begin the transition to a DAO.

The Path to Decentralization

The shift toward a DAO will follow a phased rollout that may include:

- **non-binding community proposals** (polls, surveys, and XP-based sentiment gauges).
- **snapshot voting** on key initiatives.
- **on-chain governance** feature upgrades and ecosystem expansion.

Voting power may be earned not just by holding \$PTTP, but by participating in missions, earning XP, and demonstrating ongoing support for the ecosystem. Governance should reward the most engaged, not just the most wealthy.

When Will This Happen?

The DAO phase will not begin until the community is:

- **Large enough** to prevent manipulation
- **Educated enough** to make informed decisions
- **Aligned enough** to protect the vision
- **Resourced enough** to support decentralized operations

Until then, the dev team remains accountable to the community through public communication and the ongoing evolution of the whitepaper itself.

COMPETITIVE ANALYSIS

Let's take a look at how PTTP compares with similar tokens and projects in the crypto space.

Social Impact Tokens

Impact Market (PACT)

- **Similarity:** Both aim to create positive social change through blockchain.
- **Differentiation:** Impact Market focuses on Unconditional Basic Income (UBI) distribution, while PTTP creates a broader economic empowerment platform.
- **Advantage:** PTTP's gamification elements and multiple staking options provide more diverse engagement opportunities beyond charity.

Elongate (ELONGATE)

- **Similarity:** Both use transaction taxes to fund social impact.
- **Differentiation:** Elongate donates directly to charities, while PTTP's Liberation Vaults give users choice in cause allocation.
- **Advantage:** PTTP's user-driven approach to impact creates stronger community involvement in the mission.

DeFi With Community Focus

Olympus DAO (OHM)

- **Similarity:** Both utilize staking as a primary mechanism for value creation.
- **Differentiation:** Olympus focuses on becoming a decentralized reserve currency, while PTTP emphasizes social empowerment and community building.

- **Advantage:** PTTP's more accessible narrative and lower entry barriers make it more approachable for everyday users.

Safemoon (SFM) (defunct)

- **Similarity:** The former SFM token and PTTP both implemented transaction taxes and redistribution mechanics.
- **Differentiation:** Safemoon focused on reflection to all holders, while PTTP directs taxes strategically to support ecosystem growth and social impact.
- **Advantage:** PTTP's more equitable distribution through the Activity Reflections and Fist Equalizer Bonus better aligns with its mission of economic justice.

Meme Coins

Dogecoin (DOGE)

- **Similarity:** Both leverage community enthusiasm and viral potential.
- **Differentiation:** While DOGE relies primarily on community sentiment and brand recognition, PTTP incorporates structured utilities (staking, Liberation Vaults) and a social mission.
- **Advantage:** PTTP's tax structure creates sustainable funding for development and rewards, which DOGE lacks.

Shiba Inu (SHIB)

- **Similarity:** Both prioritize the importance of community governance and ecosystem expansion, though as a newer token, PTTP is evolving toward greater community governance.
- **Differentiation:** SHIB focuses on a broad ecosystem (ShibaSwap, NFTs) but lacks the direct social impact component of PTTP's Liberation Vaults.
- **Advantage:** PPTTP's more focused mission creates stronger community alignment and purpose beyond speculative interest.

Key PTTP Competitive Advantages

- **Mission-Utility Alignment:** Unlike many tokens that bolt on charity features, PTTP's utilities directly support its core mission of empowerment.
- **Multiple Engagement Mechanisms:** The combination of regular staking, vault staking, Liberation Vaults, activity reflections, and equalizer bonuses offers more diverse participation options than competitors.
- **Economic Justice Framework:** The Fist Equalizer Bonus creates unique value for smaller holders, differentiating from projects that primarily reward whales.
- **Balanced Approach:** While social tokens often sacrifice tokenomics for mission, and DeFi tokens ignore social impact for profits, PTTP successfully balances both considerations.
- **Transparent Governance Evolution:** PTTP offers a clearer roadmap to decentralized governance than many projects that either launch with premature DAOs or remain permanently centralized.

This competitive analysis demonstrates that while PTTP incorporates successful elements from various token models, its unique combination of features and mission-driven approach creates a distinct value proposition in an increasingly crowded market.

ROADMAP

The \$PTTP project is intentionally structured to grow in phases—each unlocking greater potential for utility, impact, and community ownership. We're not here to pump and vanish. We're building something real, brick by digital brick.

Phase 1: Ground Zero

- Website launch at pttp.finance
- Social channels go live: X (Twitter), Telegram, and branding rollout
- Presale campaign (private + public phases)
- Liquidity pool seeded & token launch
- Staking platform launch

Phase 2: Fuel the Fire

- XP-based community missions and leaderboard
- Soulbound NFTs begin rolling out
- First meme and social bounty contests
- Vault staking launch

Phase 3: Forge the Future

- Liberation Vaults go live with yield-sacrifice mechanics
- Gamified airdrop and challenge system launches
- Partner onboarding and community grant disbursements
- Continued expansion of staking/NFT rewards and quests.

Phase 4: Power to the People

- Expansion to the additional CEXs and blockchain
- Launch of Skill-I-Rise
- Launch of Learn-To-Earn program

DISCLAIMERS & NOTICES

\$PTTP is a community-driven cryptocurrency project created for experimental and empowerment purposes. It is not an investment contract, security, or financial product under any jurisdiction.

By participating in this project, you acknowledge and agree to the following:

- **This is not financial advice.** Nothing in this whitepaper, website, or community channels should be interpreted as professional or investment advice. You should always DYOR (do your own research) and consult with a licensed advisor before making financial decisions.
- **There are no guarantees of profit or return.** The value of \$PTTP may rise or fall due to market dynamics, user activity, liquidity, and external factors. Fists should be prepared for the possibility of volatility and even total loss.
- **The token has no intrinsic value.** \$PTTP does not represent equity, shares, dividends, or ownership of any company or entity. It is a decentralized token intended for use within its ecosystem only.
- **All contributions are voluntary.** Participation in the presale or any aspect of the project is entirely optional and done at the user's discretion. There is no promise of continued development, utility, or price support.
- **The Treasury can fund our parent LLC.** Treasury tokens/funds are utilized for the protocol's development, marketing, and operational expenses, which includes reasonable compensation for team members. If, at times, the Treasury operates at a profit, tokens/funds can be withdrawn to the protocol's parent LLC. Tokens/funds will never be withdrawn from any rewards pools (Rewards, Liberation, Activity Reflections, Equalizer Bonus) for team member compensation or redirected to the LLC.
- **Laws and regulations vary by region.** It is your responsibility to ensure you are in compliance with your local laws regarding cryptocurrency participation and taxation.

The PTTP ecosystem is an experiment in community-led innovation and economic empowerment. By engaging with this project, you agree to accept all associated risks.

FINAL MESSAGE: JOIN THE UPRISING

The systems weren't made for us. They were made to keep us working, consuming, obeying—never questioning who holds the power. But something is shifting. The tools of freedom are finally in our hands.

\$PTTP isn't just a meme token. It's not just another chart. It's a movement, built for everyone tired of being powerless and unheard. It's for those ready to flip the system on its head and claim their right to economic and social liberation.

This is your token. Your tools. Your turn.

Meme. Stake. Earn. Build. Rise.

Join us. Be the new power. Never look back.
